DETAILED ACTION

This application is a 371 of PCT/DK04/00436 published as WO 04/111224 in English on December 23, 2004.

The preliminary amendment filed December 12, 2005 canceling claims 1-21 and adding claims 22-41 has been entered.

Claims 22-41 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:28. Group II, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:33. Group III, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:37.

Group IV, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:41.

Group V, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:43. Group VI, claim(s) 22-31 and 39-41(all in part), drawn to a polypeptide of SEQ ID NO:45.

Group VII, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:28, a vector and a host cell comprising thereof and a method of making a polypeptide.

Group VIII, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:33, a vector and a host cell comprising thereof and a method of making a polypeptide.

Application/Control Number: 10/560,224

Art Unit: 1652

Group IX, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:37, a vector and a host cell comprising thereof and a method of making a polypeptide.

Group X, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:41, a vector and a host cell comprising thereof and a method of making a polypeptide.

Group XI, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:43, a vector and a host cell comprising thereof and a method of making a polypeptide.

Group XII, claim(s) 32-35 and 38 (all in part), drawn to a polynucleotide encoding a polypeptide of SEQ ID NO:45, a vector and a host cell comprising thereof and a method of making a polypeptide.

Groups XIII-XVIII, claim(s) 36 (in part), drawn to a transgenic plant comprising the polynucleotide of Groups VII-XII.

Groups XIX-XXIV, claim(s) 37 (in part), drawn to a transgenic non-human animal comprising the polynucleotide of Groups VII-XII.

The inventions listed as Groups I-XXIV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The polypeptides of Groups I-VI lack common structure, the polynucleotides of Groups VII-XII lack common structure and thus, the molecules share no special technical feature.

The polynucleotides of Groups VII-XII and the polypeptides of Groups I-VI share no special technical feature as polynucleotides of Groups VII-XI do not encode the polypeptide of Group VI, etc.

According to PCT Rule 13.2, unity of invention exists only when the shared same or corresponding technical feature is a contribution over the prior art. The technical feature of Groups I-XII is a polypeptide or polynucleotide, which is shown to lack novelty or inventive step according to PCT Search Report (form PCT-210).

A special technical feature of Groups XIII-XVIII is a plant. A special technical feature of Groups XIX-XXIV is an animal. While Groups I-XII are drawn to an isolated chemical compound, Groups XIII-XXIV are drawn to a complex organism wherein non-isolated molecules act in accord.

Application/Control Number: 10/560,224

Art Unit: 1652

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Effective November 1, 2007, if applicant wishes to present more than 5 independent claims or more than 25 total claims in an application, applicant will be required to file an examination support document (ESD) in compliance with 37 CFR 1.265 before the first Office action on the merits (hereafter "5/25 claim threshold"). See Changes to Practice for Continued Examination Filings, Patent Applications Containing Patentably Indistinct Claims, and Examination of Claims in Patent Applications, 72 Fed. Reg. 46715 (Aug. 21, 2007), 1322 Off. Gaz. Pat. Office 76 (Sept. 11, 2007) (final rule). The changes to 37 CFR 1.75(b) apply to any pending applications in which a first Office action on the merits (FAOM) has not been mailed before November 1, 2007. Withdrawn claims will not be taken into account in determining whether an application exceeds the 5/25 claim threshold. For more information on the final rule, please see http://www.uspto.gov/web/offices/pac/dapp/opla/presentation/clmcontfinalrule.html.

Art Unit: 1652

In response to the restriction requirement set forth in this Office action, applicant is required to file an election responsive to the restriction requirement. Applicant may not file a suggested restriction requirement (SRR) in lieu of an election responsive to the restriction requirement as a reply. A SRR alone will not be considered a *bona-fide* reply to this Office action.

If applicant elects an invention that is drawn to no more than 5 independent claims and no more than 25 total claims, applicant will not be required to file an ESD in compliance with 37 CFR 1.265 that covers each of the elected claims. If the elected invention is drawn to more than 5 independent claims or more than 25 total claims, applicant may file an amendment canceling a number of elected claims so that the elected invention would be drawn to no more than 5 independent claims and no more than 25 total claims.

If the restriction requirement is mailed <u>on or after</u> November 1, 2007, applicant is also required to file an ESD in compliance with 37 CFR 1.265 that covers each of the elected claims, unless the elected invention is drawn to no more than 5 independent claims and no more than 25 total claims taking into account any amendment to the claims. To avoid the abandonment of the application, the ESD (if required) and the election must be filed within **TWO MONTHS** from the mailing date of this Office action. The two-month time period for reply is extendable under 37 CFR 1.136.

If the restriction requirement is mailed <u>before</u> November 1, 2007, the election must be filed within **ONE MONTH** or THIRTY DAYS, whichever is longer, from the mailing date of this Office action. The time period for reply is extendable under 37 CFR 1.136. Furthermore, if the elected invention is drawn to more than 5 independent claims or more than 25 total claims taking into account any amendment to the claims, the Office will notify applicant and provide a time period in which applicant is required to file an ESD in compliance with 37 CFR 1.265 covering each of the elected claims or amend the application to contain no more than 5 independent elected claims and no more than 25 total elected claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth Slobodyansky, PhD whose telephone number is 571-272-0941. The examiner can normally be reached on M-F 10:00 - 6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapura Achutamurthy, PhD can be reached on 571-272-0928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
